

# SAFETY

## What is Safety?

- ▶ **safety:** 1. the quality of being **safe:** 2. freedom from danger or risk of injury
- ▶ What Is the Meaning of Safety in the Workplace?

### Definition

Workplace safety is the concept that the environment where employees perform job duties has been secured from looming safety and health threats. It is a process that involves identifying, reducing or eliminating hazards, and making sure employees have the skills and knowledge necessary to carry out safety protocols.

## What is Safety? How can you define it?

Let's take a look at safety as though it is a menu:

Appetizer

Main Course

Desert

### Appetizer

- ▶ Set up for the day.
- ▶ What PPE are you going to need before work begins???
- ▶ Tools:

Are they in good condition?

Do you have the right tool (s) for the job?

Have you filled out your JSA?

### **Main Course**

- ▶ Maintaining a work environment that is safe for everyone requires dedication and attention to detail.
- ▶ Just like a recipe, the more you practice safety the better you get. The more you practice, the safer your work habits and performance.

### **Desert**

- ▶ The end results are you go home feeling full and fulfilled.
- ▶ You go home to your families in the same manner in which you came to work.

### **Calculate**

- ▶ You cannot put a price on Safety. You can add the numbers all day long and your Safety still comes out "Priceless".
